PROFESSIONAL SUMMARY

Frontend and Mobile Developer with 3+ years of experience building scalable, maintainable interfaces using React.js, Vue, and Next.js. . Skilled in clean code practices, agile development, and cross-platform architecture. Experienced in validation testing, debugging, and collaborating with backend teams to deliver high-quality software.

EDUCATION

Kwame Nkrumah Uni. Of Science and Technology, Ghana   **Jan 2021- Nov 2024**

Bachelor of Science, Computer Science
- Graduated with Second Class Upper Honors.

PROFESSIONAL EXPERIENCE

Psynthax Kenya Limited, Mpedigree   **2023 – 2024**

Frontend Developer (Remote, Internship)

- Contributed to frontend development using Vue.js, implementing responsive layouts and reusable components (details under NDA)
- Collaborated with backend engineers to optimize UI performance and user flows

Psynthax Kenya Limited, Mpedigree   **Oct 2024-Present**

Frontend Developer (Remote, National Service)

- Part of the frontend team working on core projects using Vue.js with a focus on maintainability and scalability (details under NDA)
- Integrated dynamic UI feedback and transitions, enhancing the overall user experience.
- Worked on multiple client-facing web applications, delivering intuitive and responsive interfaces.

Aseda BLC – USA   **May 2025-Present**

Frontend Developer (Remote)

- Developed a cross-platform web app using Next.js for collecting and analyzing biomarker samples (confidential project)
- Collaborated with a backend engineer to streamline data visualization and workflow efficiency

Edustream | Final Year Project, KNUST

PERSONAL PROJECT

- Built a video conferencing app with AI-powered student engagement features.
- Utilized Node.js for the backend and Electron with Vue.js coupled with web sockets for the frontend to support seamless real-time interaction.

SKILLS

Technical Skills: Object-Oriented Programming, Agile software development, Git and Github

Programming Languages and Frameworks: React, Javascript, Redux, Typescript, Python, Next.js, Vue.js, Swagger, Tailwind, framer motion, Zustand, Pinia, Restful API

Language: English (Advanced)

System monitoring tools: Familiar with system monitoring tools like New Relic.

Debugging

Automated testing frameworks: Jest

Validation and verification testing

INTEREST AND HOBBIES

Learning new technologies
